EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Davis Gilmer on November 7, 2005.

2. The application has been amended as follows:

in claim 9, line 8, change "an" to --the--; and

in claim 9, line 9, delete "and."

3. The drawings were received on September 1, 2005. These drawings are acceptable.

4. The following is an examiner's statement of reasons for allowance:

a. with regard to claims 1-4, prior art of record does not teach or suggests in combination a method of sampling an unknown clock signal using a known clock signal comprised of (i) forming a derived clock signal from the unknown clock signal (see claim 1, line 3) and (ii) applying the sampling and performing steps to each delayed version of the derived clock signal to produce second intermediate

values (see claim 1, lines 7-12) wherein the second intermediate values are combined with the delayed versions of the derived clock signal;

b. with regard to claims 5-7, prior art of record does not teach or suggests in combination a circuit for sampling an unknown clock signal using a known clock signal comprised of (i) circuitry for deriving a derived clock signal from the unknown clock signal; (ii) multiple sampling chains of logic elements wherein each sampling chain is coupled to one of the multiple delayed versions of the derived clock signal and to the known clock signal; (iii) multiple transition circuits; and a combining circuit, as recited in claim 5;

c. with regard to claim 8, prior art of record does not teach or suggests in combination a method for forming a number stream representing the frequency or phase of an unknown clock signal that includes applying a value indicating the expected frequency range of the unknown clock signal and then forming the number stream based on this value; and

d. with regard to claim 9, prior art of record does not teach or suggests in combination a circuit for forming a number stream representing the frequency or phase of an unknown clock signal that includes a first logic section and a second logic section as recited in claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betsy L. Deppe whose telephone number is (571) 272-3054. The examiner can normally be reached on Monday, Tuesday and Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on (571) 272 - 2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
